

An ARTEREX Company

WHO WE ARE

Our mission is simple: to deliver the best value and consistently exceed our customers' expectations.

8 Buildings (over 240k ft²) with **3** Class 8 Clean Room Molding (and Micro Molding)
24/7 Operations with Ample Capacity housing over **110** Molding Machines and a Highly Capable In-house Tool Room

Core Capabilities:

- Medical Device and Life Sciences manufacturing
- In-house injection molding specializing in complex geometries and tight tolerances
- We offer design for manufacturing, MoldFlow, rapid prototyping; everything needed to launch high volume production
- Full range of secondary operations (assembly, welding, labeling, packaging and more)
- Highly capable in-house toolroom

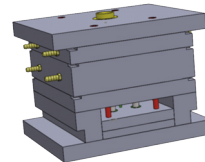

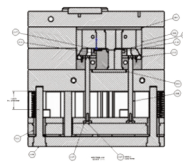

Services:

- ISO Class 8 clean room molding & assembly
- ISO 13485, ISO 14001 and FDA registered
- Strict adherence to applying statistical process controls in manufacturing
- State-of-the-art metrology & testing
- Industry leading process for managing product line transfers
- New product development led by cross functional program management teams
- Supply chain management, all the way through sterilization and distribution

We combine the latest technology with the highest quality machining to deliver world class molds faster than anyone else.

Our Tooling services include:

- Feasibility studies
- Design for manufacturability
- 3D modeling and prototyping
- Mold manufacturing
- Start up support to final mold validation
