

An ARTEREX Company

## WHO WE ARE

**LUC & BEL offers a diverse and comprehensive line of fluid management products for infusion (IV Therapy), transfusion, hemodialysis, cardio surgical, enteral & parenteral feeding, and many other types of fluid management for medical applications.**

More than thirty years of **EXPERIENCE**. Very high research standards. **INNOVATIVE** and reliable production technology. A unique range of products, from single components to pre-assembled. Highly specialized technologies, from **DESIGN** and **PRODUCTION** of molds to the design and construction of automatic machines and automated work islands.

## Injection Molding

In order to reach a high level of performance, Luc & Bel utilizes technologies that are able to guarantee the conformity with the total quality requirements and the excellence of the final product. The molding is executed in ISO Class 8 (Rif.:EN ISO 14644-1) clean room with an overall dimension of 1.200 m2. The clean room is equipped with 15 fully automatic injection molding machines, with a clamping force ranging from 80T to 300T.

## Automatic Assembly

Our automatic assembly machine division is equipped with automatic assembly machines in ISO class 8 (rif.: en iso 14644-1) clean room with an overall dimension of 600m<sup>2</sup>.

## Machine and Mold Shop

Luc & Bel offers the customized build of automatic and semi-automatic assembly machines under specific customer request. Our mold shop is fully equipped for the regular maintenance of the molds and for the construction of the automatic assembly machines.

ISO 80369 Compliant

A comprehensive component catalog is available upon request.
