

PHOENIX

An ARTEREX Company

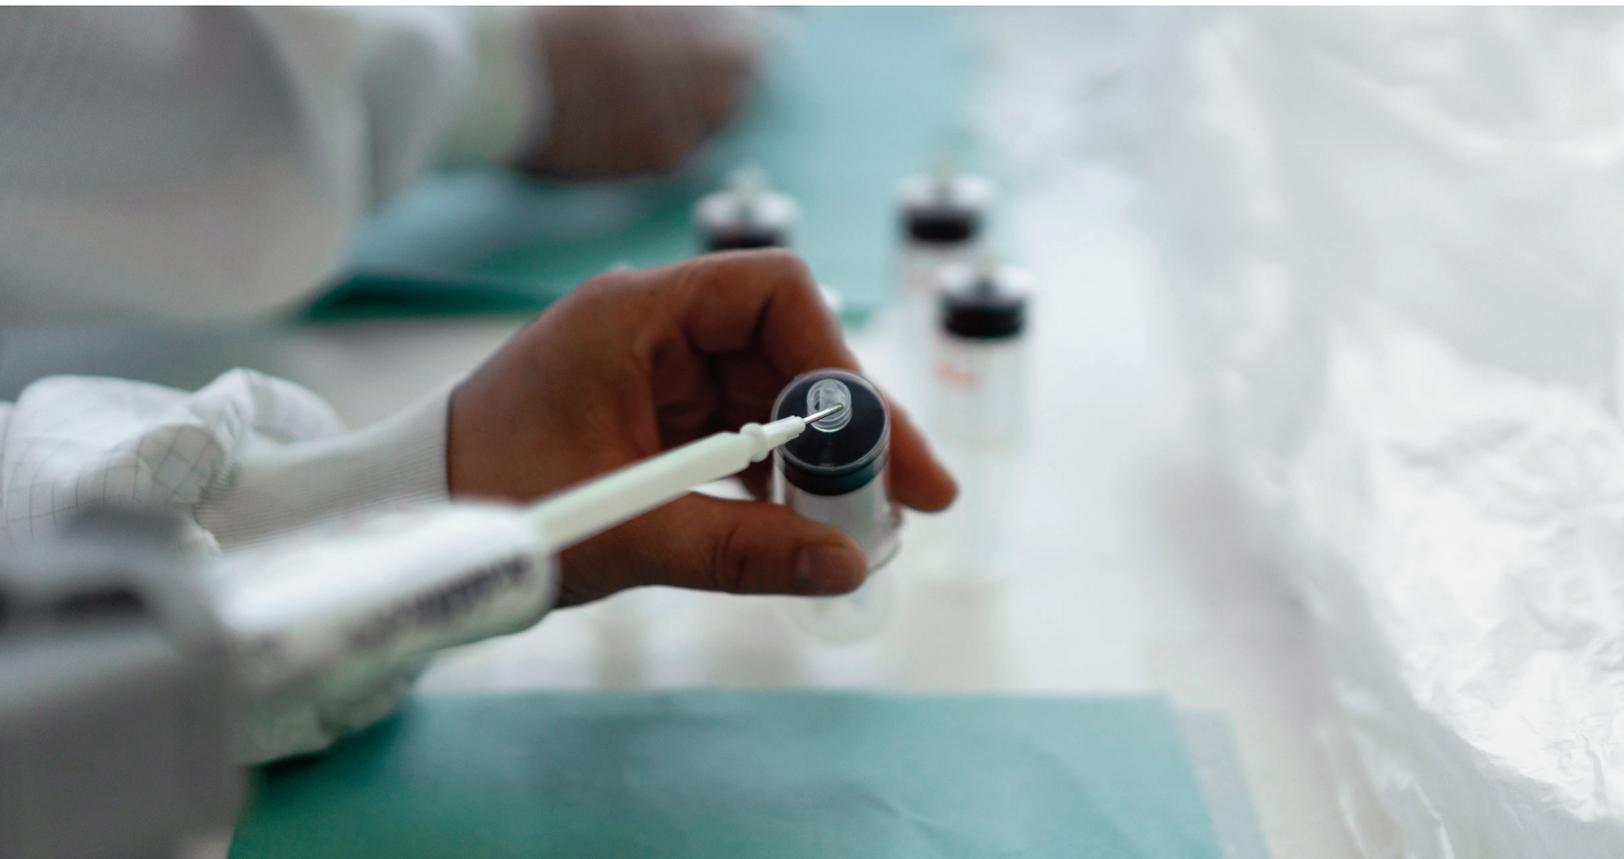

WHO WE ARE

Phoenix is a leading developer and contract manufacturer serving the MedTech sector. It stands out for its reliability and expertise from design to volume production.

Phoenix offers a wide range of services

related to the design, manufacture and marketing of

**Disposable and
Non-Disposable Medical Devices.**

Phoenix is where excellence and reliability meet to provide the most suitable solutions for MedTech and biomedical operators.

Quality first

Phoenix serves a broad array of MedTech companies and offers a wide range of services related to the design, development, and manufacture of disposable and non-disposable medical devices. Offering product development, production, assembly and packaging services in ISO 8 clean rooms, Phoenix is known for its unwavering dedication to quality and total customer support.

Experience, innovation and listening to the customer

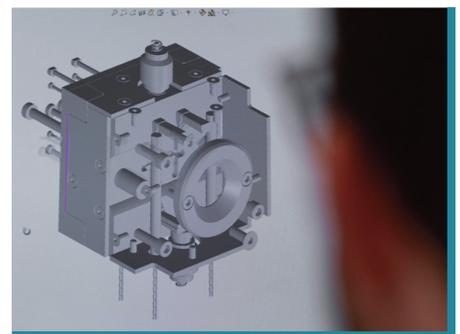

The heart of our work lies in our deep-rooted experience and innovation inspired by listening carefully to our customers' needs. Phoenix has always offered solutions tailored solutions for its partners with a view to constant improvement.

Space and equipment to guarantee a result

Phoenix specializes in the assembly and packaging of single-use medical devices. Our commitment extends far beyond simple manufacturing, offering comprehensive services that embrace the design and molding of custom-made components, along with ultrasonic cleaning and final packaging. With more than two decades of experience in the industry, Phoenix is a manufacturer of excellence, a strategic support for companies wishing to mold and market high-quality medical devices.

A reliable and competent partner

Our team has 20 years of experience in the production and design of medical devices. Thanks to our experience, we accompany and guide our customers through the certification phases and offer solutions that meet international standards.
